復興記念寫真帖

昭和五年三月

SOYBEANS AND SOYBEAN PRODUCTS.
DORSETT AND MORSE,
AGRICULTURAL EXPLORERS,
UNITED STATES DEPARTMENT OF AGRICULTURE EXPEDITION.
1929-1931.

#45192. Planting soybeans in rows between hills of corn. Chin
Chou, Manchuria, China. May 27, 1930.

#45305. Manchurian man and boy cultivating corn with soybeans inter-planted in the rows between the corn. Chin chou, Manchuria. June 19, 1930.

#45678. Examining soybean plants which stand more than waist high, in a field north of Chuwa, Chosen, (Korea).

#45681. The U. S. Department of Agriculture's soybean expert examining a field of good soybean plants near Chuwa, Chosen.

#45675. Soybeans alone and inter-planted with kaoliang at Chuwa, Chosen.
In general, the inter-planted beans appear about the same as those planted alone.

#45436. To the extreme right is a pile of kaoliang leaves or blades which were stripped from the kaoliang plants in the field to admit more light to the inter-planted crop of soybeans. Location between Peiping and Feng Tai. To the left, our interpreter and to the right the Chinese farmer.

#45650. An improved variety of soybean at the Huan Nando Prefecture Seed and Nursery Farm near Heijo, Chosen. Mr. N. Suyetake, our interpreter, is near the center of the picture, and Mr. Shirakura, the Director of the farm, is to the right.

#45785. A nearby view of a portion of a flat-stemmed soybean plant, in the field shown in the preceeding picture. Note that the pods are clustered at the top of the stem.

#45682. Soybeans inter-planted with kaoliang sparsely planted, near Chuwa, Chosen. A quite common practice here and also in Manchuria and North China proper.

#45686. Inter-planted field of kaoliang and soybeans at Chuwa, Chosen,
both crops are doing well and are looking fine.

#45437. A Chinese farmer near Feng Tai forking blades of kaoliang blades into piles. These were stripped from the plants beyond him in order that the growing crop of soybeans might receive more light.

#45435. A Chinese farmer telling Mr. Peter Liu, our interpreter, that the stripping off of the blades of kaoliang not only benefits the bean crop, but also improves the crop of kaoliang.

本主人謹啟

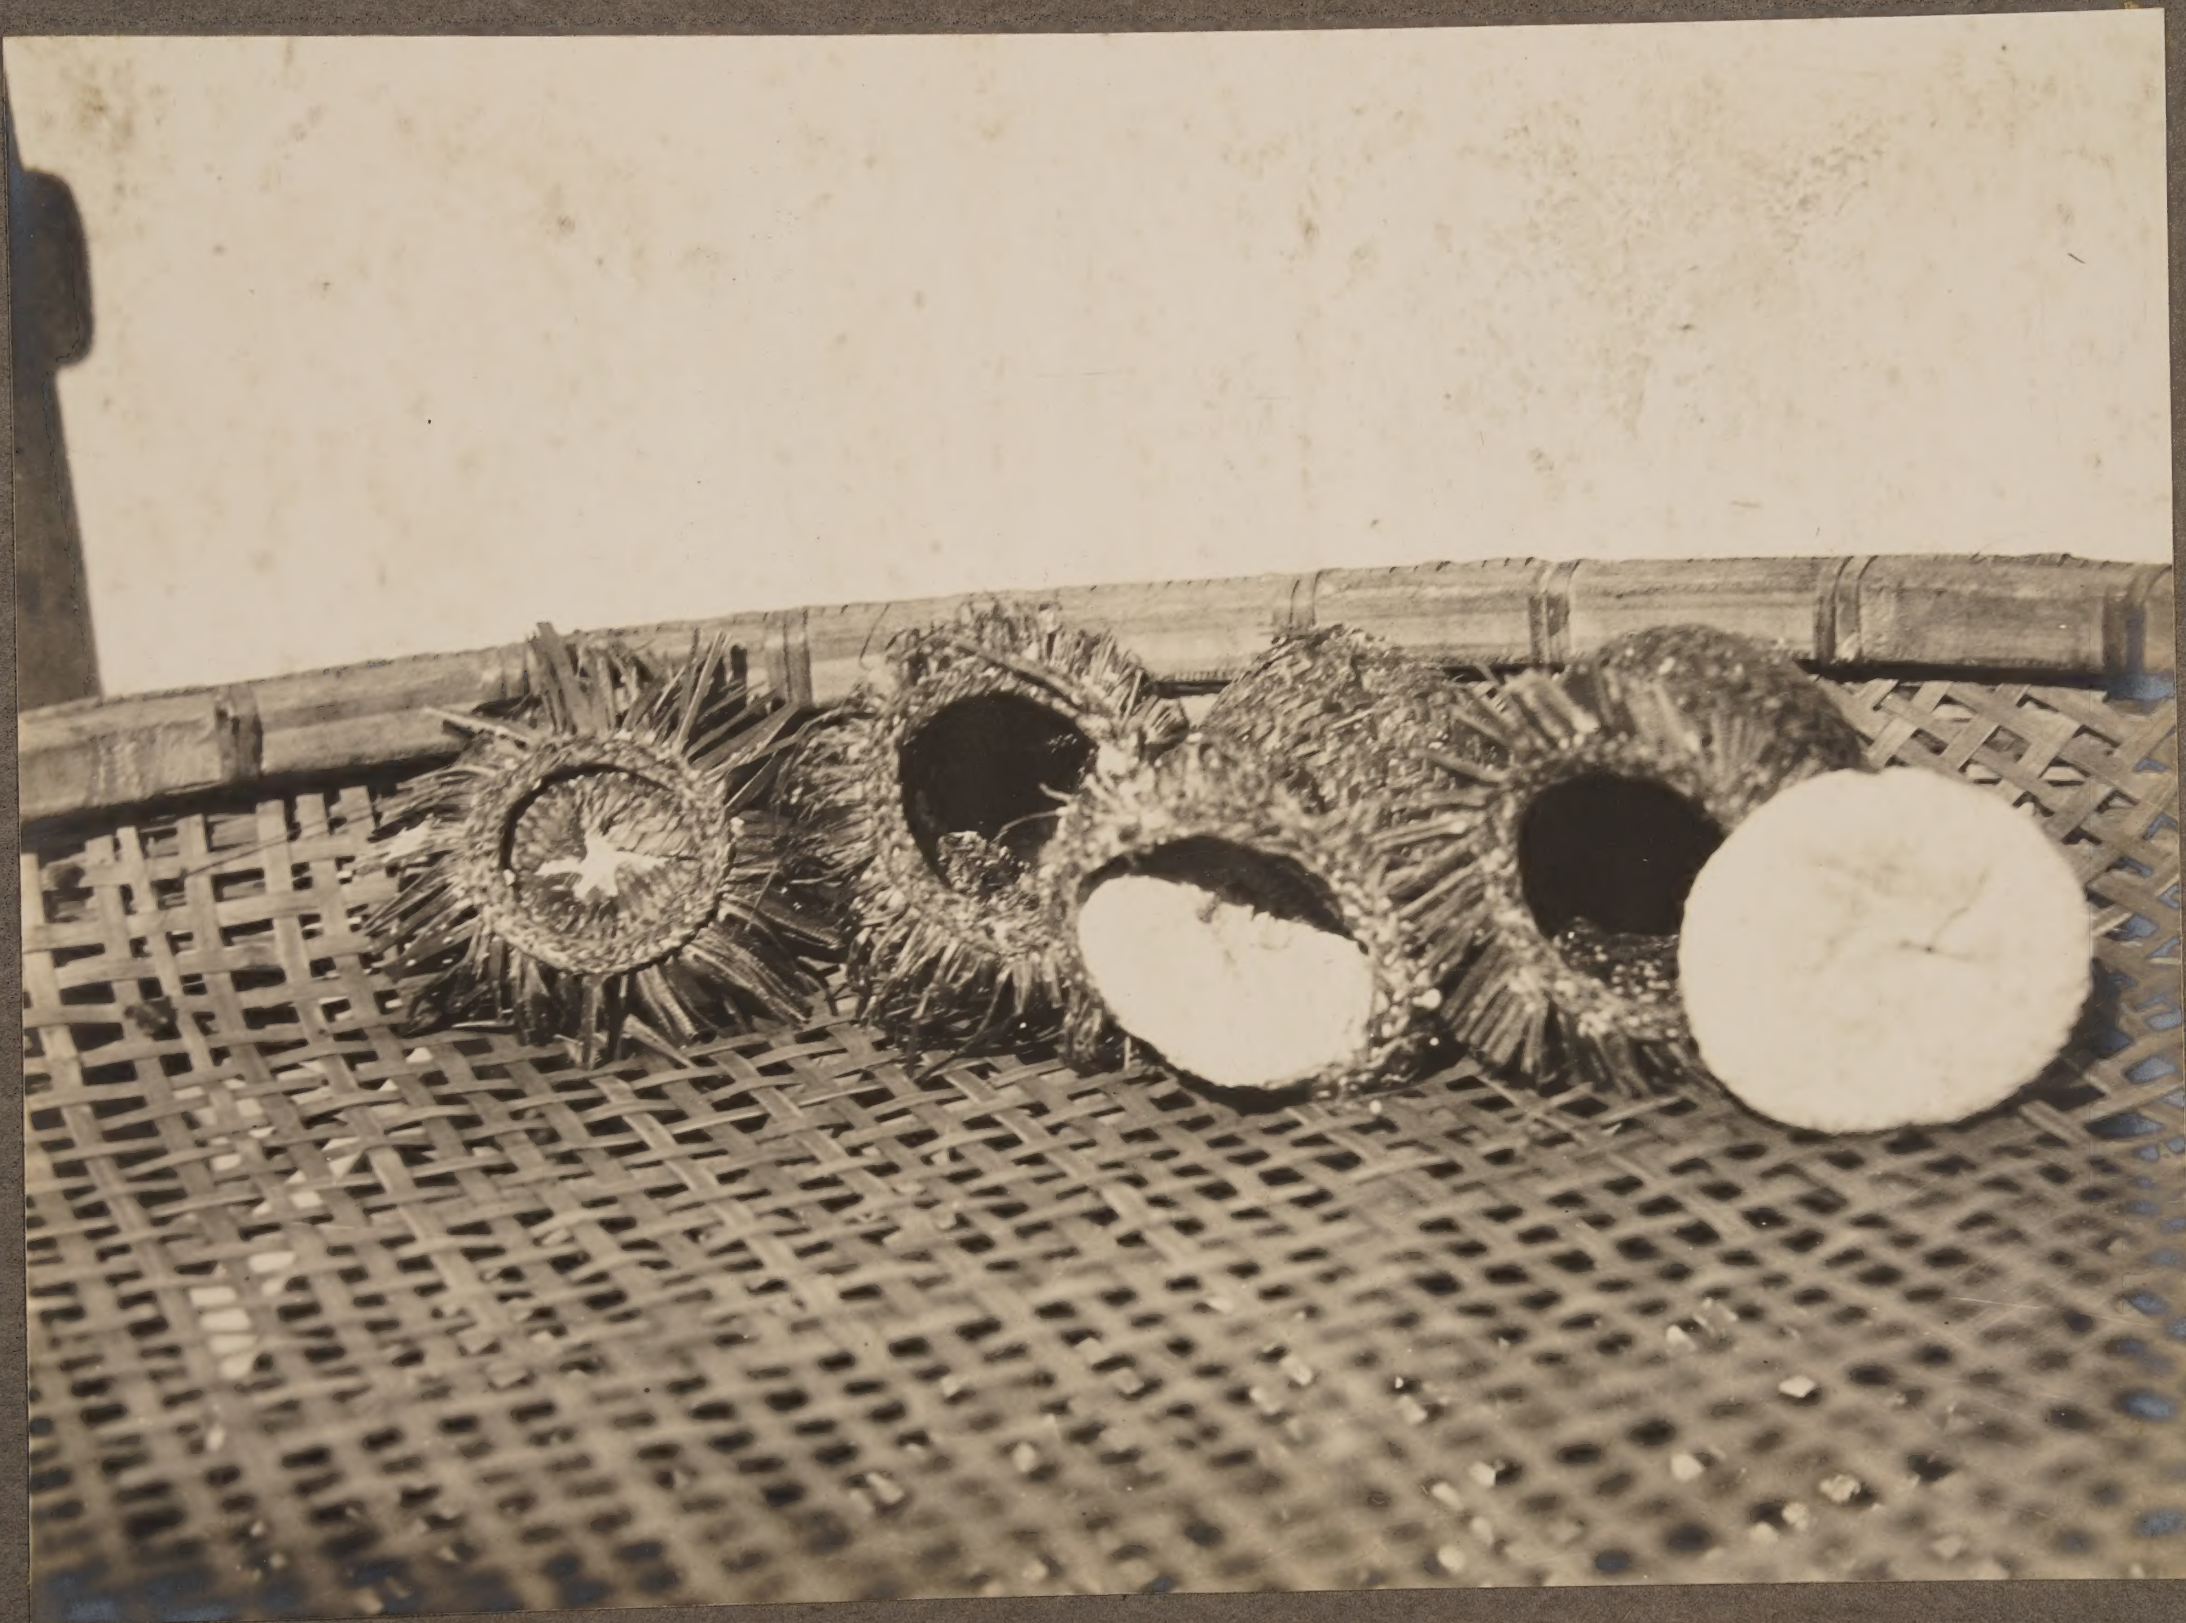

#46108. Soybean cookies made of soybean and wheat flour sweetened and molded into forms and then baked. The Chinese name is "Ton Si Ping" meaning "Crisp bean cake". At the back is shown the paper in which the cakes were wrapped.

#45545. Soybean product. White and brown cakes of soybean curd in varying forms on a street stand in Peiping, Chihli, China.

#46103. Macaroons made of soybean and wheat flour. Chinese name "Huang
Ton Ping" meaning "Yellow soybean cakes".

#46134. At extreme left is a small grass form press filled with soybean curd, next, to the right, is an empty press. The curd is almost out of the next one, and out and to one side of the fourth press. The curd is put into these small form presses and then pressed into small thin round cakes.

#45178. Soybean oil cakes in storage in one of many of the large warehouses of the South Manchurian Railway Company, in Dairen, Manchuria.

May 22, 1930.

#45251. Soybean oil cake being stored in the open in the yard of the South Manchurian Railway Company at Dairen, South Manchuria. June 7, 1930.

#45124. Osier bins of soybeans in the storage yard of a Chinese grain merchant at Kai Yuan, Manchuria. May 11, 1930.

#45289. Showing gunny bag storage of soybeans in one of a number of the large warehouses of the South Manchurian Railway Company in Dairen, South Manchuria. June 16, 1930.

#45700. View in the yard of a grain dealer on the Daido River at Heijo, Chosen, where soybeans are being graded and measured.

#45146. Stacked bags of soybeans covered with matting and tarpaulin. Each stack contains a carload of beans. These are in the open storage yard of the South Manchurian Railway Company, Dairen, South Manchuria.

#45294. Grading, weighing and stacking bags of soybeans in an open storage yard of the South Manchurian Railway Co., at Dairen, South Manchuria. The pile of bags when completed will be covered with matting and tarpaulin. June 16, 1930.

#45704. Roping rice straw bags of soybeans for shipment. View in the storage yard of a Korean grain merchant on the Daido River near Heijo, Chosen.

#45157. Loading bags of soybeans onto a German ship, docked at one of the numerous wharves of the South Manchuria Railway Company at Dairen, South Manchuria. May 21, 1930.

#45213. A Chinese junk load of bagged soybeans drawing up to unload her cargo onto the "Toyoi Maru Fushiki" docked at Ying Kou, Manchuria.
May 30, 1930.

#45755. A Korean boy near Heijo leading a familiar beast of burden in that region, heavily laden with sheaves of Italian millet.

#45659. Bundles of kudzu vines, Pueraria thumbergiana, (about five feet in length) curing in the sun. Handles of baskets, tea pots, etc., are made of these pieces of cured vines.

Landscape at Heijo, Chosen.

#45316. Collecting seed of Zoysia pungens var. Japonica along the river opposite Kokai, Chosen.

#45754. Melon and soybean field. The soybeans are along the edges of the melon beds. The small shelter was used in connection with the harvesting of the melons.
